

Step 1: Stop Jenkins

Depending on how Jenkins is installed:

```
sudo systemctl stop jenkins
```

Step 2: Edit config.xml

Now edit the Jenkins main config:

```
sudo nano /var/lib/jenkins/config.xml
```

Look for this line:

```
<useSecurity>true</useSecurity>
```

 Change it to:

```
<useSecurity>false</useSecurity>
```

 This disables authentication and role checks.

Step 4: Start Jenkins Again

Start Jenkins:

```
sudo systemctl start Jenkins
```

Step5: Go to UI and in the Mange Jenkins

---- Go to the Security

---- In Security Realm

Select ---- Jenkins' own user database

Check the allow users to sign up option
